

DGC-1000 Clamp-on Ground Resistance Tester

User-friendly and accurate. Think safety first and Amprobe's DGC 1000 ground resistance tester second.

- Accurate ground resistance measurement from 0.025 to 1500 Ω
- TRMS current measurement including leakage current
- Accurate readings regardless of power quality in less than 10 seconds
- Continuity beep if the resistance is lower than 40.00 Ω
- Simple and easy to use, no test leads or auxiliary electrodes necessary

FEATURES	RANGE & RESOLUTION*	ACCURACY
Ground Resistance	0.025 - 0.250, 9.999, 99.99, 199.9, 400.0, 600.0, 1500 Ω	$\pm 2\%$ Rdg + 2 LSD
AC Current	0.200 - 1.000, 10.00, 100.0, 1000 mA and 0.2 - 10.00A	$\pm 2\%$ Rdg + 2 LSD

REPLACEMENT PARTS <i>(supplied with product)</i>	PART NUMBER
Carrying bag	CC-ACDC
Instruction Manual	www.AMPROBE.com

*We use a special notation to indicate range AND resolution using a single number. For example: number 40.00 indicates range of 40 and resolution 0.01 (two digits after the point with the 1 as an increment, unless otherwise specified).
 **For other ranges see website (<http://www.AMPROBE.com>)
