

# Wire Tracers

*Often it is not a question of “What you know” but rather “Where does it go”. Wiring and pipes that are buried, hidden behind walls, underneath flooring, in ceilings, or underground require reliable equipment that can adapt to the application. Amprobe’s AT 4000 Series of Advanced Tracers pinpoints locations, shorts, ground faults, breakers, neutrals, and more without interrupting power or interfering with sensitive equipment.*

Wire Tracers & Breaker Tester	BT-AFT1	BT-120	BT-250	AT-1000	AT-4000 Series	AT-3000
Energized Breakers		•	•	•	•	
Arc Fault Breakers testing	•					
Voltage	120V	120V	240V	300V	600V	
Energized lines tracing				•	•	•
Unenergized lines tracing				•	•	•
Pinpointing shorts and ground faults				•	•	•
Pinpointing open wires				•	•	•
Position not sensitive receiver					•	
Specialized for buried wires and pipes						•
